Key Capabilities

Risk Discovery Engine – Powered by advanced AI and machine learning algorithms, Supervisor's risk discovery engine analyzes 100% of an organizations' financial transactions to identify anomalies and potential risks. Embedded accounting pattern recognition, enriched by over a decade of R&D, ensures the accuracy and relevance of the findings.

Pre-configured Controls for Key Business Processes – Supervisor comes with a library of over 350 pre-configured controls that cover critical business processes, including Procure-to-Pay (P2P), Record-to-Report (R2R), Order-to-Cash (O2C), Treasury Management, Travel and Expense (T&E), IT General Controls (ITGC) and more. These controls are designed to identify common accounting errors, fraud indicators, and process inefficiencies.

No Data Preparation or Cleansing: Supervisor seamlessly connects to ERPs and other systems and consolidates and standardizes all financial data into a single, unified ledger based on millions of modelled accounting patterns.

Streamlined Investigation and Remediation – Supervisor centralizes the management of investigations and remediation of identified risks. Finance and Audit team members can collaborate within Supervisor to assign tasks, track progress, and document findings.

Improved Audit and Accounting Efficiency and Effectiveness – Supervisor identifies weak transactional processes so these can be corrected in order to prevent recurring errors. Supervisor empowers internal audit teams to work more efficiently and effectively by reducing audit cycle times, improving audit quality and enhancing team productivity.

Trusted by Audit & Finance

Supervisor is trusted by many of the world's leading organizations. <Insert logos for including IKEA, Michelin, Lacoste, Cirrus Logic, Orange, ITT, Intersport, ClubMed, Hutchinson>

The Future of Internal Audit

Supervisor transforms the way internal audit and finance teams operate. With Supervisor, teams gain continuous visibility into their financial data, proactively identify and mitigate risks, and ensure the accuracy and compliance of their financial reporting. Find risk before it finds you™ with Supervisor.
